EXPERIENCE

First Robotics Competition

2016-2018

-Collaborate with a team of programmers to code the robot's RoboRIO

App Store

2019-2021

-We developed an application that shows the rotating solar system in AR and that displays the information when touched.

- We developed an application to help university students use the grammar rules of capitalization correctly in their papers and thesis.

Both applications are currently in the process of being published

2nd place on Hackathon Residencias Tec

2018

In this Hackathon we developed a chatbot that could answer all the frequently asked questions of the residents of Tec Residences via WhatsApp.
